

Smoke Signals March 2022

We make a difference

NEBULA/NEBULAmove – Attracts attention and makes it impossible for the perpetrators to orientate themselves

Valued customers and business partners,

Our GEHRER products protect your valuables during transport. To stay one step ahead of potential attackers, we are continuously developing our products. In doing so, we focus entirely on the needs of our customers and rely on state-of-the-art technologies and Swiss quality workmanship. Today, we would like to introduce you to a true all-rounder: NEBULA/NEBULAmove

NEBULA provides effective protection for your valuables both outdoors and indoors - whether in banks, commercial buildings, stores, vehicles or on the sidewalk. The modern and cost-effective system is not only handy, but also extremely intuitive to operate. Once purchased, the GEHRER product convinces with its longevity and low maintenance costs. And this is what happens during an attack: Dense fog is released in seconds and a robbery is immediately more complicated. This hinders perpetrators in orientation, generates attention and makes escape more difficult. NEBULA can also be used wherever conventional smoke is not permitted. Because no damage is caused to valuables or interior spaces - and there are no health risks to persons.

Gehrer AG - Glarnerstrasse 88 - CH-8854 Siebnen

GEHRER
security solutions

An additional advantage of NEBULA is its versatility - both as a stand-alone unit for fixed installation in vehicles and buildings and as a supplement to other GEHRER products.
